RIGHT AUDIENCE.  
**REAL ENGAGEMENT.**

# Introducing Malaysian Premium Publishers Marketplace

Malaysian Premium Publishers Marketplace (MPPM) offers high-quality inventory from local Premium Malaysia publisher websites. Back by audience data and high-impact ad solutions, MPPM will enable the delivery of branding and performance campaigns with ease and at scale.

# Agenda

- Why?
- Who and What?
- How does it work?
- How do you buy?
- What are the differences?
- How much is it?

A person with a backpack and glasses is seen from behind, looking out over a vast mountain range. The scene is filled with green pine trees in the foreground and snow-capped peaks in the distance under a cloudy sky.

# Why is MPPM Needed?

# Why? Brand Safety, Viewability, Ad Fraud

## Brand Safety is a huge issue, advertisers are concerned about!

*\*Google faced its own challenges with bad search results and an uproar over allowing ads to appear alongside highly objectionable content on YouTube and profiting from ads on sites peddling misinformation, hate speech and conspiracy theories.*

## What is defined as a view? Has my impressions really been seen?

*\*\*At 20-30%, according to nine agency executives cited by Digiday, ad viewability on the Facebook is well below the Media Ratings Council's (MRC) standard, which requires that 50% of a video ad's pixels must be in view for two continuous seconds.*

## Ad Fraud eats away at Advertiser's budget and reduced effectiveness of campaigns

*\*\*\*In an effort to combat the risk of damaging brands reputation in programmatic online advertising in Malaysia, five major online publishers signed a Memorandum of Understanding (MOU) today to form a consortium to create an advertising exchange that enhances brand safety, established regulations to protect the interests of the advertisers, provides better transparency and improves viewability.*
